

Financial Rails for Africa

Digital infrastructure in a trillion dollar economy

Ryan Watson, President

May, 2025

The Frame

Today, Africa's economy operates like a modern city with no power grid. Zimbabwe embodies this reality in the extreme:

- Massive potential energy
- Disconnected solutions
- Inefficient workarounds
- High costs of basic operations

And while global fintech focuses on first-world convenience, Africa's \$180B SME financing gap represents the last great untapped financial market.

But it's not just about money - it's about unlocking an entire continent's economic potential.

The Problem

Right now in Africa:

- SMEs in major African economies regularly pay 20-30% annual interest
- Cross-border payments average 9%
- 70% of businesses can't access basic financial services

This isn't just inefficiency - it's a handbrake on an entire continent's future.

Right now in Zimbabwe:

- SMEs pay ***upwards of 20% monthly*** (800%+ annually) interest
- The small change and payments crises in Zimbabwe's informal markets generates the need that fuels our launch plan

The Stakes

The first platform to solve these fundamental market inefficiencies will become the continental rails for local, regional, and global capital.

This isn't just another fintech play - it's the foundation for Africa's economic future.

The Solution

Introducing VimbisoPay, the first multi-denominational financial ecosystem built for African commerce on the rails of our credex-core API, lowering financial friction and accessibility barriers across the continent with:

- Free transactions on Android app and WhatsApp
- Hustler tools at \$1/m up to full Treasury suite at \$50/m
- API-first architecture

The Team

Ryan Watson, President: Canadian finance and technology entrepreneur. Small business advisor. Founder and Chief Technology Officer.

Honourable Fortune Chasi, Director: Served Zimbabwe as Minister of Energy & Power Development, Deputy Minister of Justice, Deputy Minister of Transport, and at the Reserve Bank of Zimbabwe.

Mike Dube, Zimbabwe CEO: Small business entrepreneur and community leader. National coordinator and captain of VimbisoPay's street teams.

Dr. Cathy Muchechetere, Director: Former Zimbabwean Anti-Corruption Commissioner and Chief Executive Officer of the Southern Africa Association of Accountants.

Ronald Rwankangi, Director: International and pan-African business leader. CEO of Bold Energy and former CEO and Co-Founder of Advance Afrika. Serial social entrepreneur.

Collen Ndlovu, Senior Engineer: Experienced app developer for startups and established businesses..

The Secret Sauce

Our breakthrough is true multi-denominational accounting architecture that:

- Enables zero-cost transfers of any amount
- Preserves value during hyperinflationary crises
- Complies with regulations across jurisdictions and denominations
- Is served up on a simple, secure, member-centric API
- Provides an open platform for fintech innovation

No other product can match this.

Market Validation

Zimbabwe's extreme conditions provide the perfect proving ground:

- Small change and payments crises provides an immediate critical problem to solve
- Three decades of financial hardship creates the conditions for explosive growth of effective solutions
- Sophisticated users adapted to financial innovation
- Direct path to regional expansion

Traction & Roadmap

Completed:

- **February 2025:** Launch in Zimbabwe

Targets:

- **July 2025:** \$10k USD cumulative revenue
- **December 2025:** \$25k USD monthly recurring revenue
- **2026:** Regional expansion

The Prize

Demographics alone guarantee that Africa will be the growth engine of the global economy for the rest of this century.

We're not just building a company.

VimbisoPay contributes to the economic future of a continent with distributed financial infrastructure that supports African entrepreneurs, from the street to the boardroom.
